

## Covid-19 Risk Assessment Example / Template and Supporting Guidance for Schools

Covid-19 is a new illness that can affect your lungs and airways. It is caused by a virus called SARS-CoV-2, the virus that causes Coronavirus Disease 2019 (COVID-19). Symptoms can be mild, moderate, severe or fatal.

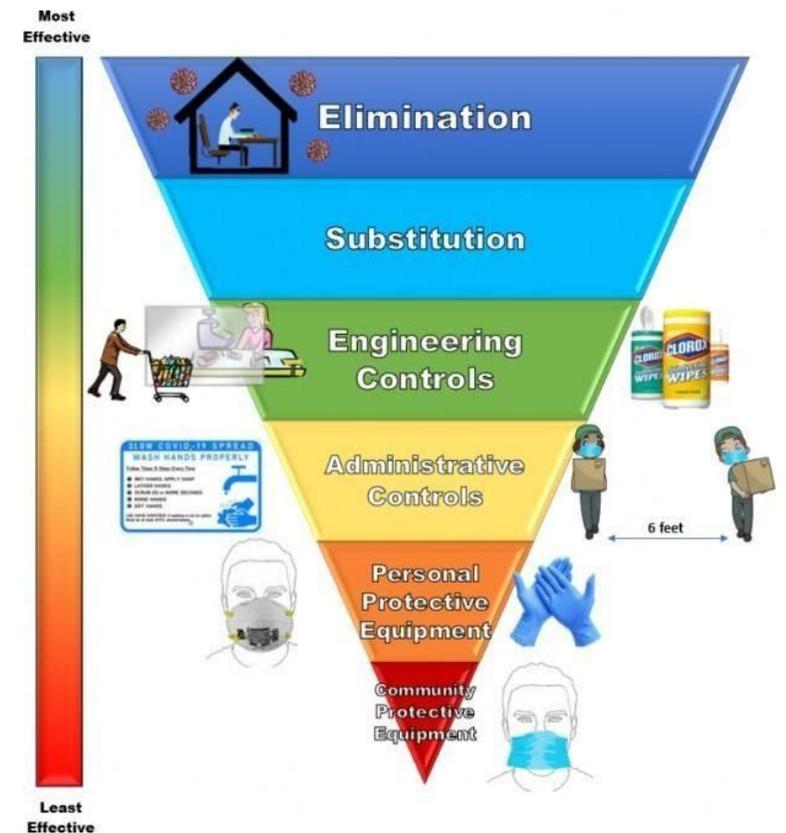

The Government has announced that from the 1<sup>st</sup> June 2020 schools should welcome back all reception, year 1 and year 6 pupils as well as all children below statutory school age and any vulnerable pupils and children of key workers. It is a key principle of the City of Wolverhampton Council that safety is more important than numbers of children in schools and settings at any time.

To support schools with this phased introduction, below is an example Risk Assessment for dealing with the current Covid-19 situation in a school setting. It is not likely to cover all scenarios and each school must consider their own unique circumstances and adapt this template accordingly, having due regard to the 'considerations' section detailed at the end of the document and the following [latest government guidance](#):

- [Coronavirus \(COVID-19\): implementing protective measures in education and childcare settings](#)
- [Actions for education and childcare settings to prepare for wider opening from 1 June 2020](#)
- [COVID-19: cleaning in non-healthcare settings](#)

The cross-infection control measures considered in the risk assessment below is based upon the following hierarchy of control:

- Elimination – Completely eliminating exposure to the hazard. The most effective control, e.g. stay home, work remotely, avoid public areas.
- Substitution – Replacing the hazard with a non-hazardous object, device or substance (none currently identified).
- Engineering Controls – Isolating the person from the hazard through physical or mechanical means e.g. barriers, partitions, ropes, hands free equipment etc.
- Administrative Controls – Changes made to the way that people work e.g. social distancing procedure, floor markings, cough / sneeze etiquette procedure, hand hygiene, cleaning and disinfection etc.
- Personal Protective Equipment – Equipment worn by the person to protect themselves from real or potential hazards, e.g. gloves, aprons, safety glasses, masks, etc.
- Community Protective equipment – Equipment worn by a person to prevent community spread from an asymptomatic carrier of COVID-19. This is the last line of defense and its effectiveness depends on community use and their ability to adopt disinfection, distancing, and hygiene practices (not considered in school risk assessment as beyond the control of a school).

## Considerations for additional control measures:

### Reduce mixing within education or childcare setting by:

accessing rooms directly from outside where possible.

considering one-way circulation, or place a divider down the middle of the corridor to keep groups apart as they move through the setting where spaces are accessed by corridors.

staggering breaks to ensure that any corridors or circulation routes used have a limited number of pupils using them at any time.

staggering lunch breaks - children and young people should clean their hands beforehand and enter in the groups they are already in, groups should be kept apart as much as possible and tables should be cleaned between each group. If such measures are not possible, children should be brought their lunch in their classrooms.

ensuring that toilets do not become crowded by limiting the number of children or young people who use the toilet facilities at one time

noting that some children and young people will need additional support to follow these measures (for example, routes round school marked in braille or with other meaningful symbols, and social stories to support them in understanding how to follow rules).

### Use outside space:

for exercise and breaks.

for outdoor education, where possible, as this can limit transmission and more easily allow for distance between children and staff.

although outdoor equipment should not be used unless the setting is able to ensure that it is appropriately cleaned between groups of children and young people using it, and that multiple groups do not use it simultaneously. Read [COVID-19: cleaning of non-healthcare settings](#).

### For shared rooms:

use halls, dining areas and internal and external sports facilities for lunch and exercise at half capacity. If class groups take staggered breaks between lessons, these areas can be shared as long as different groups do not mix (and especially do not play sports or games together) and adequate cleaning between groups is in place, following the [COVID-19: cleaning of non-healthcare settings guidance](#).

stagger the use of staff rooms and offices to limit occupancy.

### Reduce the use of shared resources:

by limiting the amount of shared resources that are taken home and limit exchange of take-home resources between children, young people and staff.

by seeking to prevent the sharing of stationery and other equipment where possible. Shared materials and surfaces should be cleaned and disinfected more frequently.

although practical lessons can go ahead if equipment can be cleaned thoroughly and the classroom or other learning environment is occupied by the same children or young people in one day, or properly cleaned between cohorts ([Coronavirus \(COVID-19\): implementing protective measures in education and childcare settings](#)).

Staff to child ratios:

Guidance on staff to child ratios from the Government for pre-school children in early years settings within Early Years Foundation Stage (EYFS) continue to apply as set out here, and we recommend using these to group children. ([Coronavirus \(COVID-19\): implementing protective measures in education and childcare settings](#)) Where the physical layout of a setting does not allow small groups of children to be kept at a safe distance apart, we expect practitioners to exercise judgement in ensuring the highest standards of safety are maintained. As stated above, caps on numbers for any session may provide support for social distancing. ([Actions for educational and childcare settings to prepare for wider opening from 1 June 2020](#))

### **Additional considerations:**

School-specific arrangements relating to risk assessment that may need additional detail:

Capacity and organisation of teaching spaces  
Arrival to and departure from school and other modes of transport  
Movement around the school  
Classroom allocations

Timetable arrangements

- Role of teaching assistants
- Breaktime and Lunchtime plan
- Catering staff
- Cleaning
- Toilets
- Staffroom and office

Effective communication is key and cannot be underestimated. Please ensure;

- Everyone is reminded of public health advice and any updates in this fast-changing situation.
- Everyone is vigilant and instructed to monitor themselves and others and look out for similar symptoms if a pupil or staff member has been sent home with suspected coronavirus.
- The school is informed by pupils' parents when pupils return to school after having coronavirus – the school informs the relevant staff.
- Staff inform the headteacher when they plan to return to work after having coronavirus.
- The headteacher contacts the local public health team immediately about any suspected cases of coronavirus, even if they are unsure, and discusses if any further action needs to be taken. Schools put into place any actions or precautions advised by their local public health team.
- Schools keep staff, pupils and parents adequately updated about any changes to infection control procedures as necessary.
- Schools publish their completed risk assessment on their website.
- Schools consult staff on the risk assessment process and share key findings from the risk assessment process with all staff and empower and encourage staff to communicate any matters of concern / any areas for improvement.
